BY HORIZON

*Leaders in industrial
grade slide-in units*

MEDICAL

CHANGES ARE ON THE HORIZON!

For over 40 years, Fibermold and Horizon Fiberglass have been leading the way with the highest quality canopies, and the only Transport Canada compliant Mobile Treatment Centers and Emergency Transport Vehicles.

This is a year of many changes and improvements for us, not the least of which is a strategic move to a new brand name and identity. As of April 2007, Fibermold and Horizon will officially be known as Tufport™. Our new brand reflects our commitment to designing and manufacturing best-in-class, cost-effective, industrial grade slide-in units to service markets throughout the world.

To further our commitment to innovation, we will be introducing a completely redesigned product line—tougher and more durable, with an esthetic that complements any modern pick-up. It's been a long time coming, and we are all very excited by the changes we're making at Tufport™ and by what the future holds.

One thing that has not changed is our commitment to excellence in our products and service. We are still family owned and operated and plan to stay that way—we pride ourselves in being able to identify our clients' needs and having the flexibility to quickly respond to ensure we meet them. We're here to build a brand that is number one in the world—synonymous with leadership, quality, and value.

You own a Tufport™. You own the Best.

**BUILT WITH FIBERMOLD™ TECHNOLOGY
COMPOSITE LAMINATE CONSTRUCTION
UNIVERSAL DESIGN FITS ANY TRUCK**

**ROLLOVER COMPLIANT
REINFORCED STRESS-CRITICAL AREAS

MEDICAL SLIDE-IN UNITS

TUFPORT™ MODEL	HEIGHT		DOOR		UNIT WEIGHT
	EXTERIOR	INTERIOR	HEIGHT	WIDTH	
MTC	73"	72"	64.5"	32.5"	1200 lbs (544 kg)
ETV	61"	60"	51"	32.5"	850 lbs (385 kg)

STANDARD EQUIPMENT

- Built with Fibermold Technology™
- Universal fit bolts into the bed of any full-size pick-up
- Composite laminate construction reinforced in stress-critical areas
- Insulated and fully finished sanitary white fiberglass interior
- "Mega Yacht" quality gelcoat
- Rubber anti-slip flooring
- Two stage locking paddle handle
- Stainless steel fasteners, hardware, and door hinges
- Frame mounted bolt down system
- Integral reinforcing for mounting medical equipment
- Heavy duty aluminum ventilator for dust reduction
- Safety glass windows
- Sliding cab window with window boot for communicating with driver
- Emergency escape exit
- Reinforced and padded squat benches with seat belts
- Steel roll cage meets Transport Canada's compliance regulations
- Accommodates up to two patients and an attendant
- One year warranty

TRANSPORT CANADA (CMVSS) CANADIAN MOTOR VEHICLE SAFETY STANDARDS COMPLIANT

CMVSS 220 Rollover protection

CMVSS 108 Lighting system and retroreflective

CMVSS 205 Glazing materials

CMVSS 206 Door locks / retention components

CMVSS 207 Anchorage of seats

CMVSS 208 Occupant restraint systems

CMVSS 209 Seat belt assemblies

CMVSS 210 Seat belt anchorages

CMVSS 302 Flammability

AMD STD 001 Static load test

Anchorage MTC module anchorages are proven to withstand greater than 20g loading

MEDICAL TUFPORT

Safety at the job site is the number one priority for every company. Workers in hazardous occupations face multiple dangers, and remote locations make access to medical care much more difficult and time consuming. Minutes and hours after a serious accident are extremely critical, and ambulances coming from distant cities are slow to respond and frequently get lost trying to locate the job site.

Having an onsite Tufport™ Mobile Treatment Center (MTC) or Emergency Transport Vehicle (ETV) can make the difference between life and death of an injured worker—providing a fast response and safe transportation to a hospital. An MTC or ETV is a cost-effective solution to quality emergency care and transportation needs for all crew sizes.

Tufports™ are the only life saving transport slide-in units that have roll-over protection that complies with Transport Canada (CMVSS) Canadian Motor Vehicle Safety Standards. Light weight at only 1200lbs, your Tufport™ can be easily mounted on any full-size pickup truck—and can be transferred quickly from vehicle to vehicle as required.

Ergonomic interior of the MTC with engineered roll protection

STANDARD FEATURES

- Overhead storage cabinet
- Rear access stair
- Fire extinguisher class ABC
- "First Aid" and "Mobile Treatment Center" or "Emergency Transport Vehicle" exterior lettering
- Reflective exterior safety striping
- "No Smoking" decal

LIGHTING

- Halogen stainless steel dome lights with infra-red driving light
- Response area flood lamp

ELECTRICAL

- Switch panel with 12 volt fuses
- Duplex receptacle 120 VAC
- Exterior 120 VAC outlets

HEATING

- Hot water heater with 2 speed fan and ceramic heater 120 VAC

WATER

- Stainless steel sink with faucet, hot and cold on-demand water
- Removable 5 gallon fresh and grey water containers
- Water heater 6 gallon

PUT YOUR TRUCK TO WORK!

We have produced 15,000 units over the past 40 years. Each and every Tufport™ is manufactured to meet the industry's toughest engineering standards with superior strength and endurance being the primary goal. Our "raise the bar" approach to fit and finish is exemplified by the fact that we use a much higher quality mold coating than our competitors on comparable components. The finish not only provides a "Mega Yacht" level of quality and performance—protecting our units from fading, osmosis, and overall fatigue—but it is also green friendly. Unlike manufacturers with mass produced truck cap processes that exclusively use fiberglass, Tufport™ incorporates composite technology into every unit built. Using a variety of advanced materials in stress-critical areas—mounting rails, sidewalls and corners—ensures our units can endure the punishment inflicted by even the most intense daily routines. All of our units are finished using industrial grade stainless steel fasteners and hardware on the doors and windows.

You can trust your Tufport™ to withstand the pounding and jarring of even the toughest daily grinds, and provide unrivaled value today and for years to come. Our commitment to building the world's most durable, longest lasting slide-in units means that every Tufport™ we make is designed to outlive any pick-up truck on the market today. Thanks to their universal fit, you can quickly transfer your Tufport™ to a new truck at any time and be back on the job within minutes.
