

THE RAPTAIR-G30 IS THE MOST AFFORDABLE GAS DRIVE ROTARY SCREW COMPRESSOR ON THE MARKET.

Rotary screw compressors have already proved their undisputed technical and performance superiority in almost all aspects over traditional reciprocating piston compressors. However, the cost of rotary screw compressors has remained the main challenge for most businesses to benefit from this technology. The RAPTAIR-G30 is a high performance, gas engine driven, rotary screw compressor that has a price point comparable to reciprocating gas drive competitors, but with reliability, durability and performance that is synonymous with VMAC rotary screw compressors.

CONTINUOUS DUTY AIR POWER

The RAPTAIR-G30 provides you with continuous air flow of 30CFM to get most day-to-day jobs done – only faster. The compressor is rated at 100% duty-cycle which means it never stops producing the air that is required. Now you can seamlessly run your air tools without any interruptions and no need to wait for your compressor to fill a receiver tank. Focus on your work and leave everything else to the RAPTAIR-G30 gas drive air compressor.

UN-MATCHED SIZE AND WEIGHT

The compressor is built from high quality light-weight aluminum components that makes it the lightest gas drive compressor available. The RAPTAIR-G30 is half the weight of competitive reciprocating models on the market. Also, its efficient design results in a small footprint that provides more room for your tools and other necessary equipment, and allows the compressor to easily fit on the side pack of a service body.

BACKED BY A LIFE TIME WARRANTY

VMAC strives to provide the best warranty service in the industry to give you the peace of mind you need. Specifically, the RAPTAIR-G30 is supported by VMAC's Lifetime Warranty* on the air end and Subaru's 5-Year warranty on the engine.*

ROTARY SCREW QUICK FACTS

DID YOU KNOW?

By reducing the weight on your service truck by 200lbs, you may be able to avoid the watchful eye of DOT

- regulations and save as much as 4% on your fuel costs.
- Powerful 100% duty cycle means you can fill a tractor trailer tire in 180 seconds.
 - Rotary screw compressors have a long history of superior performance and durability.
 - A drier, cooler option over recipricating compressors, the rotary screw compressor makes less unwanted heat and moisture in the system.
 - Smooth air delivery eliminates the need for large receiver tanks in most applications.

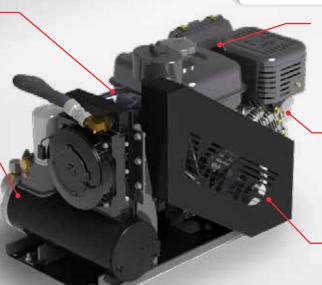

SYSTEM COMPONENTS

AIR COMPRESSOR

VMAC rotary screw, 100% duty cycle, 30CFM@100PSI, VMAC Lifetime Warranty*

Patent pending integrated oil/air separator and air/oil cooler

THROTTLE CONTROL

Controlled by system air pressure, idles down/up automatically with air demand

Powered by

Subaru EX40 14HP gasoline OHC engine, Subaru 5-Year Warranty*

DRIVE SYSTEM

Gearless, clutchless, auto-tensioned serpentine belt, aluminum belt-guard

OPTIONAL EQUIPMENT

Dual 6-gallon air receiver tanks with G30 mounting frame that includes gauge, fittings, hose, and valves (Adds 10" to height and 90lbs (41kg) to weight)

• REMOTE CONTROL PANEL

A500038

Remote panel with 10 foot extension for key switch, hour meter, and choke

NOISE REDUCTION **EXHAUST RESONATOR**

Engineered muffler extension that significantly reduces engine noise

COMPACT. POWERFUL.

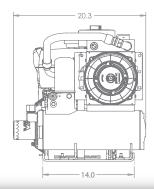

SPECIFICATIONS

Compressor Type	Belt Driven, 100% duty cycle, VMAC oil-injected rotary screw
Rated Air Capacity	30CFM @ 100PSI (150PSI max)
Engine	Subaru EX40 14HP gasoline OHC engine, electric start, EPA and CARB-compliant, Subaru approved application
System Weight (wet)	Approx. 205lbs (93kg)
Dimensions	20.7" (h) x 20.3" (w) x 33.5"(l)
Mounting Plate	14.0" (w) x 25.0" (l)
Decibels (dB) @ 20 feet	86dB
Fuel Tank Capacity	1.8 gallons
Safety Features	Compressor thermal protection circuit Automatic rapid blow-down valve on tank 200PSI pressure relief valve
